

## ‘Knock Out’® Roses

This line of roses was bred by American William (Bill) Radler. His original 'Knock Out'® rose came on the market in 2000 and this series of roses **leads rose sales world wide**. They are disease resistant and compact with good bloom repeat. The original has semi-double, bright cherry red flowers produced in small clusters. Bill reports, "They are resistant to leaf hopper, Japanese Beetles and tolerant to rose midge." Add to that winter hardiness to zone 5 and no wonder they are so popular.

Other roses in the ‘Knock Out’® family include: 'Double Knock Out'®, 'Pink Double Knock Out'®, 'Pink Knock Out'®, 'Rainbow Knock Out'® and 'Sunny Knock Out'®.
